

# Clamp Stowage Plate

The Stowage Plate is intended to provide a means to attach a K78160A, K78160ASRS, REB-IP or GAT-IP clamp when the STS 300 Ground Monitoring System is not in use. Using this method of stowage will eliminate the possibility of improperly stowing the clamp in a way that impacts functionality or subjecting the clamp to damage by being left on the ground.

**Special Technical Services Inc.**

## Installation instructions:

1. Remove contents from the kit bag.

2. Remove two bottom or side center bolts on enclosure.

3. Place the Stowage Plate over the cover and align the two mounting holes .

4. Add the (2) 5/16 bolt flat washers (supplied) as shown below and replace the bolts.

5. Tighten the bolts to 11 ft-lbs. Do not overtighten.

6 . The Stowage Plate can now be used to properly stow the ground clamp
